Freelance Web Development Projects:

Online Freelancer | 2022-2023

Graphic Designer Portfolio Website

- **Description:** Designed and developed a responsive one-page portfolio website to showcase the work of a graphic designer. The website features several interactive sections, including an introduction, about, skills, work, and contact sections.
- **Technologies Used:** HTML, CSS, JavaScript
- **Achievements:** Implemented smooth navigation between sections using JavaScript, ensuring a seamless user experience. Created an engaging and visually appealing design to reflect the graphic designer's aesthetic.
- **Results:** The portfolio website successfully highlights the graphic designer's skills, work, and contact information. Increased the designer's online presence, allowing potential clients and employers to easily view the portfolio and get in touch.

Frontend Development for E-Commerce Website

- **Description:** Collaborated with a client to create the frontend for a simple e-commerce website. The website included essential features such as a dynamic menu bar, product display, and contact section.
- **Role:** Frontend Developer
- **Technologies Used:** HTML, CSS, JavaScript
- **Achievements:** Designed and implemented a user-friendly menu bar with easy navigation, enhancing the website's accessibility. Developed a responsive product section with engaging product images and information, providing a visually appealing shopping experience.
- **Results:** Successfully delivered a polished frontend for the e-commerce website, ensuring seamless interaction and presentation of products.

Key Achievements:

Graphic Designer Portfolio Website:

Designed and implemented a visually captivating portfolio website that effectively showcases the graphic designer's work, leading to increased client engagement and inquiries.

Leveraged HTML, CSS, and JavaScript to create an intuitive and seamless user experience, resulting in positive feedback from both the designer and website visitors.

E-Commerce Frontend Development:

Successfully developed a dynamic frontend for an e-commerce website, integrating a responsive menu bar and product section that improved user navigation and interaction.

Utilized JavaScript to enhance user experience, implementing smooth transitions and hover effects, resulting in a modern and engaging online shopping platform.

Tailwind CSS Animation Project:

Created a captivating animation project using Tailwind CSS, showcasing intricate two-mode hover effects that received positive feedback from users and clients.

Demonstrated proficiency in advanced CSS techniques and animation principles, positioning myself as a skilled frontend developer capable of delivering visually impressive web elements.
